PROFESSIONAL SUMMARY

Full-stack developer specializing in AI/ML, having deployed 15+ live web applications. Runner-up at Smart India Hackathon 2024. Proficient in the MERN stack, Next.js, and Python, focusing on distributed system design, scalable cloud infrastructure, and latency-optimized UI/UX.

EDUCATION

Newton School of Technology (ADYPU)

Bachelor of Technology in Computer Science (AI/ML); GPA: 8.01/10.0

2024 – 2028

Pune, MH

Aawasiya Public School

Intermediate (Class XII); Grade: 77.0%

2022 – 2024

Madhubani, BR

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript (ES6+), NoSQL, SQL, HTML/CSS

Web Frameworks: React, Next.js, Node.js, Express.js, Tailwind CSS, Prisma ORM

AI/ML & Data: PyTorch, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

Tools & Databases: MongoDB, MySQL, Supabase, Git, Figma, Vercel, Render, JWT/OAuth

EXPERIENCE

Freelance Developer

Full-Stack Developer

Dec 2024 – Present

Upwork / Fiverr

- Delivered **10+ deployed web applications** for international clients, focusing on minimal UI/UX, dark-mode aesthetics, and component-driven architectures to improve user retention.
- Solved nested state management issues in React, **reducing re-render times by 30%** for client dashboards via restructured component hierarchies and data caching.

Vidhalaya Udhyam Association

Software Engineering Intern | Certificate

Jun 2025 – Aug 2025

Remote

- Developed and deployed two **full-stack e-commerce platforms** using the **MERN stack**, enabling local artisans to establish an online presence and process digital transactions.
- Optimized an open-source book accessibility platform by integrating **OAuth 2.0** and **React-based UI components**, improving login security and overall accessibility.
- Implemented **Tailwind CSS** for **100% mobile-responsive design**, ensuring cross-browser compatibility and significantly faster load times.

PROJECTS

OpenBox | GitHub-style Version Control System

Source Code | Demo

Oct 2025

Next.js, Express.js, Mongo, Monaco, JWT

- Engineered a custom VCS supporting real-time editing, concurrent collaboration, and version history tracking, replicating a fully functional **browser-based IDE**.
- Implemented **Diff-Match-Patch algorithms** for precise version tracking and **JWT-based authentication** for secure repository access and role-based controls.
- Built **RESTful APIs** with Node.js and Mongoose, achieving **99.9% uptime** on Vercel and Render for high availability and rapid concurrent responses.

SnackBag | Hyperlocal E-Commerce Platform

Source Code | Demo

Apr 2025

React, Javascript, Supabase, Razorpay

- Launched a subscription-based meal platform recording **4.5k events** and **400+ daily active users**, generating **INR 10,000+** in revenue within 10 days by optimizing the **conversion funnel**.
- Integrated **Razorpay** for secure payments and **Supabase Auth** for 2FA, ensuring a **0% transaction failure rate** during operational validation.

ACHIEVEMENTS

- Runner-Up, Smart India Hackathon 2024 (Certificate):** Developed "NavSmart" for Delhi Transport Corporation; architected a **low-latency routing engine** for urban transit challenges.
- Open Source Contributor (VS Code):** Resolved **color contrast accessibility issues** in the agent chat view, merging code into the **Microsoft repository**.
- Google Big Code Qualifier:** Advanced through **Round 1** of the competitive programming contest, **ranking in the top 15,000 nationally** via optimized data structures.

ACTIVITIES

- Professional Badminton:** University-level player actively training under Olympian Dipankar Bhattacharya.
- Creative Writing:** Published poet and writer focused on crafting narratives and cinematic expression.
